

SmartAgriHubs is celebrating its one-year anniversary

From the 9th to the 11th of March in Bucharest, Romania, the **SmartAgriHubs Stakeholder Conference** will celebrate the achievement of one of the largest Horizon 2020 dedicated to European agriculture.

From launching an Innovation Portal to establishing more profound links with and between the Digital Innovation Hubs, Competence Centers and Flagship Innovation Experiments, we have built a far-reaching yet tight ecosystem that fosters the uptake of digital innovations in European agriculture. Nonetheless, a lot of work remains to be done. Working towards creating a shift at the European level requires dedication, cooperation, diversity and innovation.

In order to keep on working towards that goal, it is essential that, throughout the project, all the partners and stakeholders are provided with opportunities to connect with one another. Therefore, in addition to the stakeholder's event on the first day, the second and third days are dedicated to building synergy within the project and with other similar Horizon 2020 initiatives. Projects such as [IoF2020](#), [Demeter](#), [Nefertiti](#), [Atlas](#), [FAIRshare](#), [Smartchain](#), [Desira](#), [Cybele](#), [iFishIENCi](#), [agROBOfood](#), [Open Dei](#) and [Innoseta](#) will attend. There will be many possibilities to meet, greet and share knowledge in the exhibition area.

Are you part of a project creating a digital solution for the European agriculture market, but you are looking for organisations who can help you with technical or business advice? Or are you a stakeholder interested in learning more about digital technology and engaging in discussion? Our event welcomes you, please click [here](#) to register.

What is SmartAgriHubs?

SmartAgriHubs is a €20 M EU project under the Horizon 2020 instrument and brings together a consortium of well over 164 partners in the European agri-food sector. The project aims to realise the digitisation of European agriculture by fostering an agricultural innovation ecosystem dedicated to excellence, sustainability and success.
