

## CEMA presents the 2022 European Agricultural Machinery Industry Report

### PRESS RELEASE

**Brussels, 21<sup>st</sup> December** – The European Agricultural Machinery Industry Association is glad to present its **2022 Industry Report**, detailing the characteristics and key figures of the industry represented by CEMA.

The report provides a **complete overview** of the agricultural machinery industry in Europe based on the latest figures available. Our industry is a fundamental part of the agri-food system. Agricultural machinery manufacturers develop and provide high quality equipment to farmers, cooperatives and contractors that allow the production of safe and nutritious food.

Mindful of the need to transition our food systems to ensure they are more sustainable, resilient and innovative, the European Agricultural Machinery Industry proposes advanced equipment, services and technologies adapted to the needs of all European farmers. Technological innovation and modern agricultural machinery are instrumental to reignite the green transition in Europe. Sustainable farming is our shared future, for the common benefit of our citizens, our farming communities, and our industries.

The report includes highlights on very current topics, with a focus on the effect of Russia's war against Ukraine on the agricultural equipment, parts and components flows in Europe, and on agricultural robots.

The report is available [here](#).

**CEMA aisbl** ([www.cema-agri.org](http://www.cema-agri.org)) is the association representing the European agricultural machinery industry. With 11 national member associations, the CEMA network represents both large multinational companies and numerous SMEs active in this sector.

The industry comprises about 7,000 manufacturers, producing more than 450 different types of machines with an annual turnover of about €40 billion and 150,000 direct employees. CEMA companies produce a large range of machines that cover any activity in the field from seeding to harvesting, as well as equipment for livestock management.
