European Tractor Market 2012

Data collected by CEMA suggests that the total market for tractors in those 19 countries of Europe covered by its statistical analysis decreased marginally – by 0.3% - in the six months of 2012. As last year saw a strong recovery this was in fact a satisfactory result although in a number of markets there appears to be some early signs of a slowdown in reaction to a degree of uncertainty in farming largely driven by difficult weather conditions.
